Finding your dispatched event in CAVacars 2

First, ensure you dispatched the event flight on the website. You should see a message like this after clicking the green Dispatch button.

Then, open CAVacars 2 and go to the **Dispatched** tab. Your event is in the list, with its flight number and **Event** in the Type column. Make sure the flight number matches.

If the flight doesn't appear, click **Refresh** at the top of the list.

When you load into your simulator at the departure airport, CAVacars 2 picks the flight up and tracks it, so your event progress is recorded when the PIREP is filed.

> For more details, see Finding and dispatching a flight and Flight tracking in the CAVacars 2 Pilot Guide.
