# Participating in Discord

We invite all pilots to join the event in our Discord server to socialize with other Canada Air pilots while flying.

For convenience, we've added a **Join Discord Event** button to each event detail page. Click it to be taken to the event in Discord, where you can add a reminder for yourself to join the voice channel when the event starts.

> Please practice proper microphone discipline while participating in an event flight in Discord. While we do not always fly on online networks, we highly encourage you to configure your microphone settings to Push-To-Talk mode, or ensure you mute Discord appropriately when you speak to ATC or your wife and pets.
