Version 1.1.0

New Feature: Chat Messages

The screenshot displays the 'Live Flights' interface in smartCARS 3. On the left, a sidebar is expanded to show a chat messages board. A message from 'CAN3023 - Jan P.' is visible, containing an admin message about the new chat feature. Below the chat is a text input field and a 'Send Message' button. The main area shows a world map with yellow airplane icons indicating live flights. Below the map is a table of flight data.

Flight Number	Pilot	Dep ICAO	Arr ICAO	Aircraft	Type	Phase	DTG	ETA
SWA 2153	CAN3487 - Larry K.	KSA N	KSFO	Boeing 737-800	Charter	Approach	10 nm	00: HH: 04 MM
CSN2 853	CAN1231 - Roy S.	ZGG G	YSSY	Airbus A350-1000	A350 Launch Tour - Leg 22	Descent	32 nm	00: HH: 06 MM
CAN CA10	CAN1031 - John E.	CYVT	CYVG	Airbus A320	Canadian Capitals Tour - Leg 10	Descent	64 nm	00: HH: 10 MM

The Live Flights screen in smartCARS 3 now has a sidebar on the left that can be expanded to reveal a messages board for pilots to post chat messages while in flight.

You can tag other pilots by typing the @ symbol, which will reveal a selection list of pilots who are currently live. Messages with your name in it will be highlighted.

You will see the toggle button highlighted in yellow when new messages are posted.

This is a first version of this feature, so please provide feedback on our Discord, and remember that our [Code of Conduct](#) applies to these messages!
