

Integration with Third-Party Tools

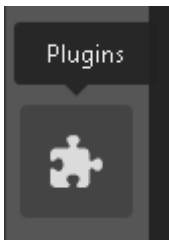

- [Setting up SimBrief](#)

Setting up SimBrief

smartCARS 3 supports SimBrief integration via the use of an optional plugin. Follow these steps to install and configure it.

Install SimBrief Plugin

Go to the **Plugins** icon in the left side bar.

Click the **Browse Plugins** button in the top right.

Available Plugins
You can install community-wide plugins via this system.

Search
Enter a name, description, or author to search.

Manage Plugins

Name	Author	Version	Last Updated	
SimBrief	TFDi Design	1.0.3	2024-11-28 16:57:34	<div>Verified</div> <div>Netr</div> <div>Add</div>

Restart smartCARS 3 for the plugin to activate

Configure the SimBrief plugin

Go to the **Settings** and fill out the new SimBrief settings.

Settings

Tracking provider
FSUIPC: Uses either FSUIPC or XPUIPC (windows only)
X-Plane: Uses UDP to retrieve data from X-Plane

IP address of the machine running X-Plane
Only used when using X-Plane with UDP

Automatic PIREP submission
Whether smartCARS should automatically submit a PIREP when the flight phase changes to DEBOARDING

Save

fsuipc

127.0.0.1
