

# Setting up SimBrief

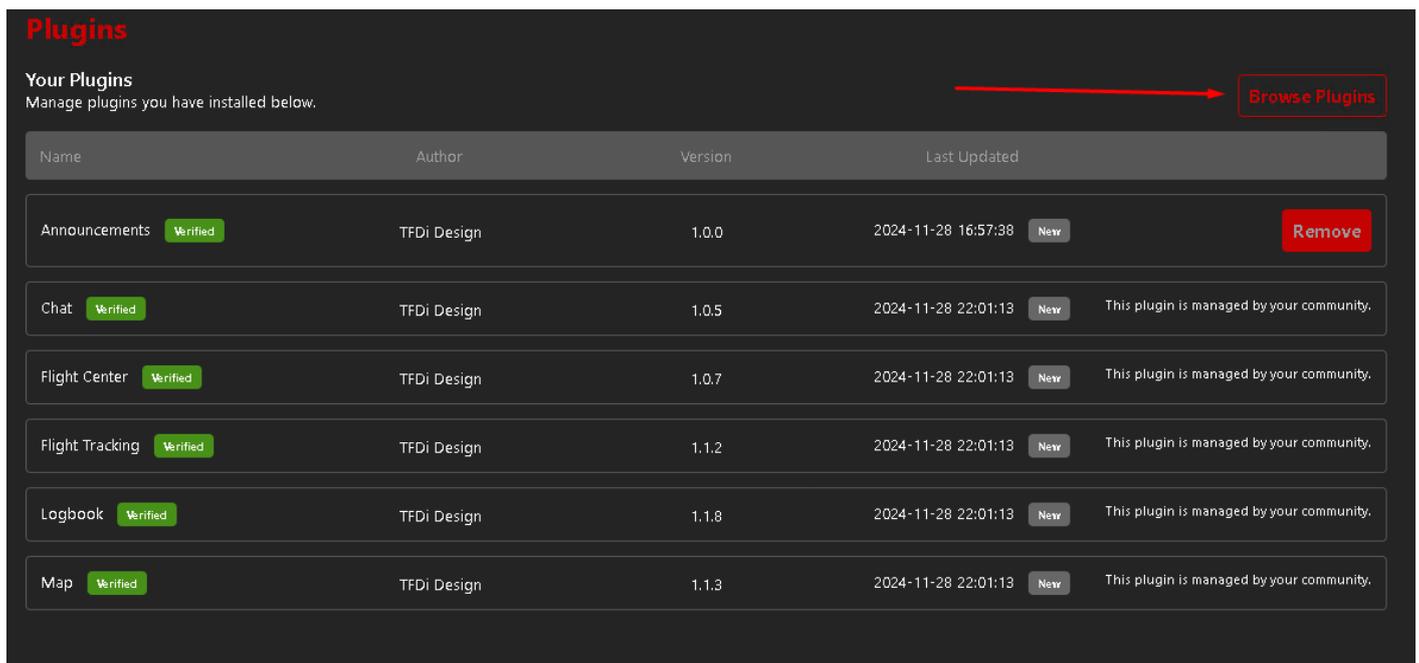

smartCARS 3 supports SimBrief integration via the use of an optional plugin. Follow these steps to install and configure it.

## Install SimBrief Plugin

Go to the **Plugins** icon in the left side bar.

Click the **Browse Plugins** button in the top right.

The screenshot shows the 'Plugins' management interface. At the top left, the word 'Plugins' is written in red. Below it, the section 'Your Plugins' is displayed with the subtitle 'Manage plugins you have installed below.' In the top right corner, there is a red button labeled 'Browse Plugins' with a red arrow pointing to it from the left. Below this is a table with columns for Name, Author, Version, and Last Updated. The table lists several plugins, each with a 'Verified' badge, a 'New' badge, and a 'Remove' button. The first row is 'Announcements' (version 1.0.0, last updated 2024-11-28 16:57:38). The other rows are 'Chat', 'Flight Center', 'Flight Tracking', 'Logbook', and 'Map', all with version 1.0.5, 1.0.7, 1.1.2, 1.1.8, and 1.1.3 respectively, and last updated on 2024-11-28 22:01:13. A note next to each of these plugins states 'This plugin is managed by your community.'

Name	Author	Version	Last Updated
Announcements <span>Verified</span>	TFDi Design	1.0.0	2024-11-28 16:57:38 <span>New</span> <span>Remove</span>
Chat <span>Verified</span>	TFDi Design	1.0.5	2024-11-28 22:01:13 <span>New</span> This plugin is managed by your community.
Flight Center <span>Verified</span>	TFDi Design	1.0.7	2024-11-28 22:01:13 <span>New</span> This plugin is managed by your community.
Flight Tracking <span>Verified</span>	TFDi Design	1.1.2	2024-11-28 22:01:13 <span>New</span> This plugin is managed by your community.
Logbook <span>Verified</span>	TFDi Design	1.1.8	2024-11-28 22:01:13 <span>New</span> This plugin is managed by your community.
Map <span>Verified</span>	TFDi Design	1.1.3	2024-11-28 22:01:13 <span>New</span> This plugin is managed by your community.

Find the SimBrief plugin and click the **Add** button.

## Plugins

Available Plugins  
You can install community-wide plugins via this system.

Search  
Enter a name, description, or author to search.

Name	Author	Version	Last Updated	
SimBrief <span>Verified</span>	TFDi Design	1.0.3	2024-11-28 16:57:34 <span>New</span>	<span>Add</span>

Restart smartCARS 3 for the plugin to activate

## Configure the SimBrief plugin

Go to the **Settings** and fill out the new SimBrief settings.

## Settings

Tracking provider  
FSUIPC: Uses either FSUIPC or XPUIPC (windows only)  
X-Plane: Uses UDP to retrieve data from X-Plane

IP address of the machine running X-Plane  
Only used when using X-Plane with UDP

Automatic PIREP submission  
Whether smartCARS should automatically submit a PIREP when the flight phase changes to DEBOARDING

### SimBrief Settings
